

TECHNOLOGY SOLUTIONS

Providing the tools to revolutionize
your construction workflow

YOUR CONSTRUCTION TECHNOLOGY PROVIDER

WHO WE ARE

SITECH Southwest is the leading technology solutions provider for the Construction, Mining, and Agriculture industries servicing Arizona and Southeast California. SITECH is an authorized dealer for Trimble, Caterpillar, and Spectra Precision providing sales and support for machine control, grade checking, and survey or engineering software solutions.

As your construction technology partner, we can help you make smart decisions, decrease costly mistakes, and increase efficiency with your project. Let us show you how!

JOBSITE TECHNOLOGY SOLUTIONS

- **Site Controller Software** | Provides the ability to quickly resolve survey problems on site and the flexibility to complete any task in the field.
- **Site Hardware** | Central to Site Positioning Systems is your sensor hardware. You can use either Laser, GPS or Total Stations.
- **GPS & Total Stations** | Trimble survey systems are designed to meet the specialized needs of the construction industry. You can choose among a range of options to suite your individual applications, flexibility and performance requirements.
- **Spectra Laser Instruments** | With increasing accuracy requirements and faster completion times, your bids need to be razor sharp just to compete. The Trimble laser family of products features the cutting-edge Spectra Precision Laser line comprised of three series of cost-effective laser solutions.

MACHINE CONTROL TECHNOLOGY SOLUTIONS

- **Trimble Grade Control Systems** | Say goodbye to stakes and other materials that make work more difficult. Accurately remove and place soil from the comfort of your cab and do it in record time.
- **Loadrite – Payload & Scale Systems** | Whether you require basic weighing information for a small loader, or greater accuracy and data capture capabilities for production-sized loaders. The LOADRITE wheel loader scale product line is recognized as setting the standard for the industry.
- **Landfill Solutions** | Trimble solutions for paving can help contractors ensure quality, reduce expensive material usage, and pave to the tight accuracies required by today’s government agencies.
- **Trimble Roadworks** | Trimble Roadworks 3D Paving Control Platform and Trimble PCS900 3D Paving Control System allows you to accurately control the screen to pave with with variable depth and slope based on a 3D design.
- **Compaction Control System** | Enables the contractor to accurately control the compaction process, while reducing unnecessary passes that result in over compaction.
- **WorksManager** | Trimble WorksManager ensures you’re always connected and up to date with automatic data transferring between devices and the field.
- **WorksOS** | Site supervisors and project managers can maximize jobsite efficiency with Trimble WorksOS. This cloud-based operating system delivers 3D productivity and real-time progress to plan remotely with project information straight from the machine.

SUPPORT SERVICES

- **Training** | We offer customized training and host a number of free learning seminars throughout the year to highlight new technology, give machine demonstrations, or teach you how to use the latest Trimble Software.
- **Repair Center** | Certified and preferred service authorized Trimble Repair Center. Our technicians can service, repair and calibrate Trimble, Caterpillar, Spectra Precision or many other manufacturer brands.
- **Drone Services (Unmanned Aerial Vehicle)** | Our licensed and insured operators provide certified drone data collection training using the latest technology.
- **Business Center** | The only office software you need to manage, analyze and process construction jobsite data. Need help with data prep? We can show you how to produce data for material activities and production.
- **3D Modeling provided by TOPS** | Take-off Professionals is a team of knowledgeable and experienced engineers who will prepare a 3D model for site work machine control, layout, and additional uses.

PEOPLE AND TECHNOLOGY YOU CAN RELY ON

SITECH® is the leader in providing easy-to-use, comprehensive Trimble construction technology solutions for contractors of all sizes. From Trimble and Cat® machine control systems, to site positioning and software, SITECH provides the support, expertise, and experience to increase your productivity and maximize your return on investment through advanced worksite solutions.
